Eric,
Monday 4/10 afternoon works the best for me

Let's plan on setting up a call on Monday. I am open all day. Let me know your preference. It would be helpful for me to have your comments ahead of time. In that way, I can have a preliminary draft of EPA comments to facilitate discussion and finalize following the discussion for delivery to LWG.

Thanks, Eric

RE: Sediment Trap FSP

Jean,
I'm wrapping DEQ's comments on the FSP up & plan to send them to EPA this afternoon. DEQ had a couple of comments re: locations & number of traps at RM 2, RM 11, & RM 16. I'd like to participate in the call.

Hi all,

I looked at the sediment trap FSP and it appears that they shifted quite a few of the locations that were suggested by the agency team in the scope of work. I thought the locations we had picked made sense and I would like to discuss the changes further with others. Eric and I were thinking about discussing the locations either on Friday (before 2PM) or Monday, working around another internal EPA call. Does anyone else have concerns regarding the sediment trap FSP or want to participate? Please

forward this email to anyone else that may want to participate.

-Jean
